**Tech:** Zsh/Bash, VSCode, Vim, AWS(S3, EC2), Azure, Sketch, Adobe XD

---

## Employment

### Royal Dutch Shell

**August 2019 - Current**

Contract - React Frontend Developer

Using React, Redux, Flow, GraphQL, Hooks, Highcharts, Styled-Components, JEST & React-Testing-Library. I helped build Shell's Trading and Risk teams a portfolio manager with the ability to view and filter trade data. Alongside this work I also helped co-build a React component library with a Shell standardised branding and styling theme for use across other internal React projects.

### Smartzr

**March 2019 - August 2019**

React Frontend Developer

Working within an agile environment performing weekly sprints with Jira. Using React, Redux, SASS, JEST and enzyme to develop key features for Smartzr's self-service portal and video player. Working closely with the CEO and sales team to design and develop custom shoppable videos for top fashion brands such as Missoni, COS, Emilio Pucci, Bulgari.

**YesOjo**

Freelance - React Frontend Developer

**December 2018 February 2019**

A short term project to help update YesOjo's website to reflect new designs and functionality. Using React, Redux and Styled-Components.

**BigHand**

**May 2015 - March 2019**

Global Cloud Engineer

Using Salesforce, SQL, Windows Server 2012 + and BigHand's bespoke software I helped to manage and maintain the business's SaaS solution across three continents. Working closely with the companies Sales, Support, Finance and Development teams to ensure BigHand's large user base received the best possible software and customer experience. I had also built an in-house tool using the MERN stack to help track and update client licencing information.
